

Sutaphat Thipnattaya

Program Management
Coordinator
KETL

▶ Started at Kimball Electronics in 2022

- Sutaphat is a resident of Chonburi, Thailand. In her free time, she loves exploring new cafes and restaurants, and going to the gym to relieve stress. A unique habit of Sutaphat is wearing clothing in the designated color of the day, which helps colleagues recognize the day of the week.
- Sutaphat stated that Kimball Electronics values work-life balance and prioritizes the well-being of its employees. The company arranges exercise classes for employees every week and she really enjoys participating in these classes to alleviate office syndrome. She also respects her team's efforts to bridge the generation gap through team activities and parties. This has significantly contributed to her team's ability to work well together and foster a positive work environment.
- Kimball Electronics provides the opportunity to engage in a variety of tasks beyond her primary job responsibilities, which Sutaphat appreciates. Additional roles such as MC and 5S president have not only helped her to improve her skills but also allowed her to thoroughly enjoy her time at Kimball.
